

**US Army Corps
of Engineers**

**Interpreting the Sedimentary Record:
Theory and Field Methods**

Great Lakes Maritime Academy, Room 112, at
Northwestern Michigan College - Great Lakes Campus
715 E. Front Street at Barlow Avenue
Traverse City, MI

28 July - 1 August 2014

Presented By:
U.S. Army Corps of Engineers, Detroit District
Great Lakes Hydraulics and Hydrology Office
With Support from the Great Lakes Commission

28 JULY (Monday) – Glacial Sediment

- | | | |
|---------------|--|---|
| 8:00 – 8:30 | Introduction
Class Overview
Great Lakes Tributary Modeling Program | (Jim Selegean,
USACE – Detroit District) |
| 8:30 – 10:30 | Identification of Glacial Sediment <ul style="list-style-type: none"> • Glacial (till) • Glaciofluvial (outwash) • Glaciolacustrine (bedded sands, silts and clays) | (Grahame Larson,
MSU Geology Dept.) |
| 10:30 – 10:45 | BREAK | |
| 10:45 – 12:00 | Identification of Glacial Sediment (continued) <ul style="list-style-type: none"> • Glacial (till) • Glaciofluvial (outwash) • Glaciolacustrine (bedded sands, silts and clays) | (Grahame Larson,
MSU Geology Dept.) |
| 12:00 – 1:00 | LUNCH while traveling to field site | |
| 1:00 – 6:00 | Interpret Glacial Sediments in the Field <ul style="list-style-type: none"> • Glacial (till) • Glaciofluvial (outwash) • Glaciolacustrine (bedded sands, silts and clays) | (Grahame Larson,
MSU Geology Dept.) |
| ≥ 7:00 | Icebreaker at hotel (Bayshore Resort) – Informal gathering to eat, drink and get to know your classmates. (833 East Front Street, Traverse City, MI 49684, (800) 634-4401) | |

Theory and Field Methods**

Great Lakes Maritime Academy, Room 112, at
Northwestern Michigan College - Great Lakes Campus
715 E. Front Street at Barlow Avenue
Traverse City, MI

28 July - 1 August 2014

29 JULY (Tuesday) – Fluvial and Pond Sediment

8:00 – 8:45	Fluvial Environments and Features <ul style="list-style-type: none">• Fluvial• Lacustrine/Pond• Man-made	(Faith Fitzpatrick, USGS, Madison, WI)
8:45 – 9:30	Field Identification	(Faith Fitzpatrick, USGS, Madison, WI)
9:30 – 10:00	Soils	(Faith Fitzpatrick, USGS, Madison, WI)
10:00 – 10:15	BREAK	
10:15 – 11:15	Reconstructing Alluvial and Lacustrine Sed. Environments <ul style="list-style-type: none">• Pre-field Characterization• Field Methods• Laboratory Methods	(Faith Fitzpatrick, USGS, Madison, WI)
11:15 – 12:15	Examples	(Faith Fitzpatrick, USGS, Madison, WI)
12:15 – 1:00	LUNCH while traveling to field site	
1:00 – 6:00	Interpret Fluvial/Pond Sediments in the Field <ul style="list-style-type: none">• Deltas• Channels• Floodplains• Buried soils• Terraces	(Faith Fitzpatrick, USGS, Madison, WI)

Interpreting the Sedimentary Record: Theory and Field Methods

Great Lakes Maritime Academy, Room 112, at
Northwestern Michigan College - Great Lakes Campus
715 E. Front Street at Barlow Avenue
Traverse City, MI

28 July - 1 August 2014

30 JULY (Wednesday) – Sediment Budgets, Tracers and Bedload

- 8:00 – 9:00 Sediment Budgets (Dr. Mark Riedel,
Wisconsin DNR)
- What is a sediment budget
 - Steps in developing a sediment budget
 - Challenges – data comparability, time scales, estimation, etc.
 - Example
- 9:00 – 10:00 Sediment Tracers (Dr. Mark Riedel,
Wisconsin DNR)
- Background tracers
 - Introduced tracers
 - Sediment budget example application
- 10:00 – 10:15 BREAK
- 10:15 – 11:15 Quantifying Bed Sediment (Dr. Mark Riedel,
Wisconsin DNR)
- Why?
 - Methods
 - Examples – residence time, pollutant loading
- 11:15 - 12:15 Dendrochronology (Dr. Mark Riedel,
Wisconsin DNR)
- What is it and why is it used?
 - Methods
 - Examples – sediment budgets, rates of fluvial processes, etc.
- 12:15 – 1:00 LUNCH while traveling to field site
- 1:00 – 6:00 Designing sediment tracer field studies (Dr. Mark Riedel,
Wisconsin DNR)
(road crossings, riffles, bars, bluffs, etc.)
- Field dendrochronology
 - Riverbank survey work to estimate sediment volumes
 - Quantifying via survey
 - Erosion pins
 - Scour chain site

Interpreting the Sedimentary Record: Theory and Field Methods

Great Lakes Maritime Academy, Room 112, at
Northwestern Michigan College - Great Lakes Campus
715 E. Front Street at Barlow Avenue
Traverse City, MI

28 July - 1 August 2014

31 JULY (Thursday) – Coastal Features and Deposits

- | | | |
|---------------|---|---|
| 8:00 – 9:00 | Introduction to the Coastal Depositional System <ul style="list-style-type: none">• Controls on Shoreline Sedimentation• Coastal Process and Littoral Transport• Shoreline Behavior• Shoreline Features | (Todd Thompson,
Indiana Geological Survey) |
| 9:00 – 10:00 | Identification of Coastal Facies <ul style="list-style-type: none">• Types• Characteristics | (Todd Thompson,
Indiana Geological Survey) |
| 10:00 – 10:15 | BREAK | |
| 10:15- 11:15 | Coastal Sequences <ul style="list-style-type: none">• Transgressive• Regressive/Aggradational | (Todd Thompson,
Indiana Geological Survey) |
| 11:15 – 12:15 | Chronostratigraphic Techniques <ul style="list-style-type: none">• Applications• Short-lived vs. Long-lived Isotopes (Cs¹³⁷, Pb²¹⁰ and C¹⁴)• Optically Stimulated Luminescence (OSL) | (John Johnston,
University of Toronto) |
| 12:15 – 1:00 | LUNCH while traveling to field site | |
| 1:00 – 6:00 | Interpret Features in the Field <ul style="list-style-type: none">• Visit modern Peterson Beach• Visit Platte Lake strandplain• Demonstrate vibracoring | (Todd Thompson and
John Johnston) |
| ≥8:00 | Sediment Transport Movie Night (hotel breakfast room) | |

**Interpreting the Sedimentary Record:
Theory and Field Methods**

Northwestern Michigan College - Great Lakes Campus
715 E. Front Street at Barlow Avenue
Traverse City, MI

28 July - 1 August 2014

1 AUGUST (Friday) – Examining Modern Sediment Sources and Sinks

- 8:00 – 9:00 Overview of field site (Jim Selegean,
USACE – Detroit District)
- 9:00 – 9:30 Travel to Boardman River
- 9:30 – 2:00 Field identification of fluvial sediment sources and sinks and the examination of other items of fluvial significance on Boardman River. Canoes will put in at Ranch Rudolph and take out at Brown Bridge Dam. Trip will pass through impoundment delta and the wedge of incision created by a partial draw-down. We will examine the composition of the point bars, bed and banks and discuss the significance of these features.

END OF CLASS
