

USACE Program FY 2010

■ Toxics ■ Habitat ■ Nonpoint ■ Invasive ■ Accountability

- \$46.3M in FY 2010
- \$13.5M reprogrammed to Asian carp project

Habitat & Wildlife Restoration

Eight ecosystem restoration projects scheduled for construction with E&W and GLRI funds

Nearshore Health & NPS Pollution

Tributary Models being developed or enhanced at 21 watersheds with E&W and GLRI funding to support state and local conservation and NPS pollution prevention

Nearshore Health & NPS Pollution

Twelve watershed studies that will evaluate multiple water resources issues

Nearshore Health & NPS Pollution

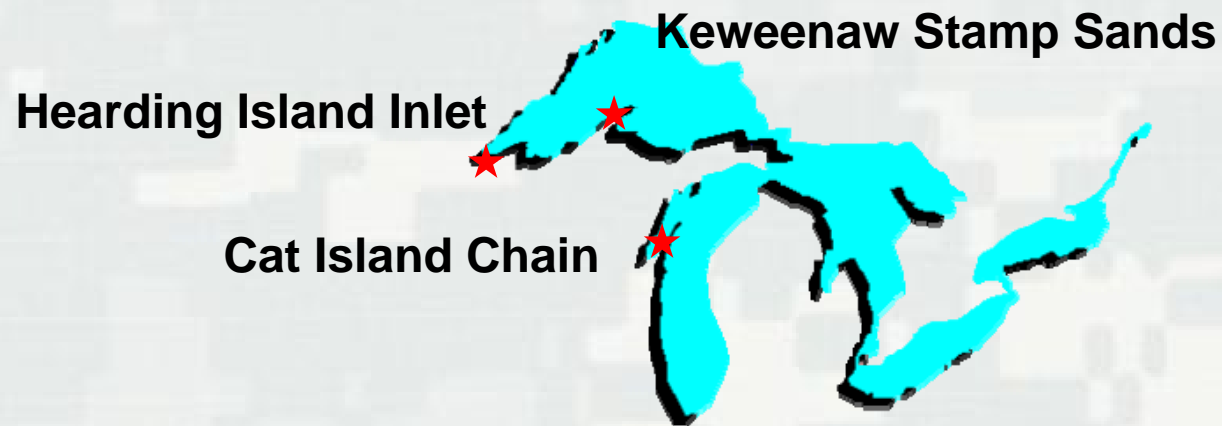

Regional sediment management plans to integrate dredging needs of multiple navigation projects and promote beneficial use of dredged sediments

Nearshore Health & NPS Pollution

Projects to restore coastal habitat are being studied at three locations

Nearshore Health & NPS Pollution

Regional studies to support GLRI goals and objectives

- Study on the capacity of existing dams on tributaries to retain future sediments
- Technical guide for enhancing coastal habitat as part of breakwater maintenance and repairs
